ENERGY TECHNOLOGY & POLICY: WANXIANG FELLOWS PROGRAM IN CHINA

Joint Program by Northwestern University and Wanxiang Corporation

LOCATION: Beijing & Hangzhou, China

UNIVERSITIES: Peking University & Hangzhou Wanxiang Polytechnic

TERM: Summer 2015 (6 weeks), with class sessions in Spring 2015 and Fall 2016

PROGRAM DESCRIPTION:

Through the Wanxiang Fellows Program, you will explore topics on renewable energy in the US and China while gaining exposure to Chinese language and culture over the course of three quarters:

• Spring Quarter 2015: Gain a foundation for understanding energy and sustainability issues and visit Wanxiang America Corporation’s solar panel manufacturing facility.
• Summer Quarter 2015: Engage in four weeks of courses and program excursions at Peking University in Beijing, followed by a two-week intensive program at Hangzhou Wanxiang Polytechnic, exploring issues of energy technology and application through seminars by Wanxiang researchers and practitioners. Visit important sites in Beijing, Hangzhou, and Shanghai, including the Great Wall, Tiananmen Square, and Xixi Wetlands.
• Fall Quarter 2015: Present group projects on energy policy or technology issues in China.

COURSES:

• ISEN 390-SA: Special Topics in Energy and Sustainability: Energy and Sustainability in China
• Chinese Language
• Choice of:
  - Public Health in China
  - China in Transition: Ideology, Political Economy, Law, and Relations with the United States
