Multi-scale models for assessing the basic processes that regulate CO$_2$ storage

Giuseppe Buscarnera, PI
Aaron I. Packman and Andrew D. Jacobson, co-PIs
Arghya Das, Post-Doctoral Collaborator
Yang Bai, Minwei Xie and Yida Zhang, PhD Students
The project has studied the coupled mechanical, hydrologic, and chemical response of granular materials subjected to microstructural changes.

Coordinated Multi-scale Modeling and Compression/Fluid-Retention Experiments

Reactive-flow and X-ray mapping of pore-scale calcite precipitation

Prior to precipitation

After precipitation
