

**Citizens'
Greener
Evanston**
Act Locally. Breathe Globally.

Dear NU Transportation Center People,

Citizens' Greener Evanston (CGE) is a group of community members working together with the City of Evanston, IL to improve community control of our greenhouse gas emissions. We promote community awareness, advocate public policies, and make connections to support a regional sustainability agenda.

Find more information about our activities on CGE's Facebook Fan Page: <http://www.facebook.com/CitizensGreenerEvanston>

CGE is organized in task forces and sector in order to address its goals and better serve the Evanston community.

Since Transportation is one of our core action fields, we do have a dedicated task force. Its members, cooperating with the City and transportation agencies serving Evanston, work to:

- make public transportation easier, more predictable and more adaptable to Evanstonians' needs;
- increase awareness of transportation options and foster better bike/car/pedestrian relations in the community;
- attract community's attention on fuel options alternative to oil.

The Transportation Task Force is currently renewing its composition and gathering all available information in order to set up concrete goals, strategies and actions.

If interested in supporting the Task Force activities with your skills, time and volunteer work contact Brian Becharas, Task Force Chair, at bbecharas@aol.com

Citizens' Greener Evanston acts to improve community control of our greenhouse gas emissions. We promote community awareness, advocate public policies, and make connections to support a regional sustainability agenda.
