ESW: Wind Energy

Aliza Abraham, Co-Project Manager
Dylan Barstow, Co-Project Manager
Harold H. Kung, ESW Advisor
Project Development

Commercially Produced Turbine

Funding from ISEN allowed for the direct purchase of blades to fit with our commercial turbine received as a donation.

Student Designed Tower

With the turbine and blades accounted for, our team focused on designing many variations and prototypes of a support structure.

Internationally Inspired Sustainability

At the core of our project is the desire to educate others and explore multinational possibilities of renewable energy.
